INTELLIGENT HEATING CONTROL

Further information at www.housetechsolutions.co.uk

HouseHeat

HouseHeat communicates wirelessly between the room thermostats and automatic valve motors fitted to each radiator valve in place of traditional thermostatic or manual valve heads. Each room thermostat controls up to 8 valve motors, which means that a maximum of 8 radiators can be controlled by one room thermostat. For rooms with more than 8 radiators, two or more room thermostats can be used. A master controller is available if required from which all room thermostats in the building may be controlled. The HouseHeat system is compatible with most old and existing radiator valves on the UK market.

The system is ideal for flats, houses, offices, holiday homes, restaurants, schools etc. – in fact any building in which radiators are used for heating.

Products

HouseHeat Pack 1

- One FHT 80B Wireless Room Thermostat
- One FHT 8V Wireless Valve Motor

HouseHeat Pack 2

- Two FHT 80B Wireless Room Thermostats
- Two FHT 8V Wireless Valve Motors

HouseHeat Pack 3

- Two FHT 80B Wireless Room Thermostats
- Three FHT 8V Wireless Valve Motors

HouseHeat FHT 8V Valve Motor

Wireless motor for HouseHeat system
To be fitted on radiator valve

“Climate change and energy”

Climate change is the greatest environmental challenge facing the world today. Rising global temperatures will bring changes in weather patterns, rising sea levels and increased frequency and intensity of extreme weather. The effects will be felt in the UK; internationally there may be severe problems for people in regions that are particularly vulnerable. We are acting now to adapt to climate change and to reduce the risk by contributing less to the causes.
